# R&P Hot Cold Skincare Device User Manual

" အလှအပရေးရာဆရာဝန် ထောက်ခဲ့မှုနဲ့ Customer Review အဖျားစုံးရထားပဲ NO.1 R&P Reputy Devices"

#### Product Structu

#### Featur

Each person's face has at least 3 million pores, while cleansing liquid and hands can only clean the skin surface. It is difficult to remove the oil pores. Only clean out the pores of the oil residue, can the skin recover deep clean. Our company Lessons learned 46 years specializes in skin care experience, and the whole development process guided by skin specialists, combined with our advanced engineers to sonic micro-vibration technology, fitting fact of intelligent design, no dead comprehensive clean your skin. 8000 times per minute high-frequency vibration to vibrate out of deep pores oil and deeply clean every pores. Pores no blockage, skin delicate and smooth. High vibration change the skin more through deep clean.

A Japanese university professor shows that repeatedly reaching the skin at a temperature of 42  $^\circ$  C helps cell to produce HSP protein, repairing skin cells and strengthen skin elasticity to resist the formation of wrinkles. The warm 42  $^\circ$  C treatment also helps to dilute the pores for deep cleansing, while the cold treatment with a cold effect of up to 6  $^\circ$  C instantly tightens pores and locks in water and skin care product. Alternating warm and frozen skin care to stimulates the liquid circulation at the bottom of the skin and speeds up the metabolism of the cells. Besides effectively reducing the elimination of eye circles and simple eye lines, it also brighten skin. Even without makeup, the skin is also brighting. Combined with micro-vibration, it is beneficial to enhance the skin's firmness and relieve fatigue.

#### Ice effect

Helps to firm the skin, maintain elasticity, and prevent problems such as allergies.

- ② Shrinks pores, locks in moisture and reduces wrinkles.
- Soothes sore muscles and relieves skin fatigue.

#### Warming effect

- Warming opens pores and promotes absorption of skin
- ②Attach a cotton pad for deep cleaning, which can better export

#### 3. EMS microcurrent principle

Using the unique EMS current to help the muscles can be moved repeatedly. It can feel the acupuncture and elasticity of the skin. Stimulate the subcutaneous tissue to activate cells and stimulates collagen contraction and reorganization and makes new collagen; makes muscles stronger and more resilient vibrant and more elastic, improve fine lines and wrinkles on the skin surface to restore youthful, smooth and supple skin soft and white.

#### 4 \ Principles of light wave therapy

Narrow red light (620nm±10nm) has better effect on dry skin

Red light promote blood circulation and the collagen regeneration enhance the skin elasticity, to make the skin to be smooth and moisture. Be suitable for the slack & wrinkly skin.

Narrow blue light (470nm ± 10nm) has better effect on oily skin

Blue light help kill the bacteria, promote the blood circulation. It can penetrate into 2.5mm under the cortex, and destroy the bacteria living environment, anti-inflammatory, bactericidal, remove acne, acne scars and so on effectively.

#### SPECIFICATION

Name: R&P Hot Cold Skincare Device Product number: D829
Use power: ≤8.5W Battery capacity: 1000mAh

Input voltage: DC 5V Net weight of host: 168g

Temperature range: 6-42° C(±5°) Work time: 5min/time or 2min/time

Vibration frequency: 8000(±10%)rpm Host size: 187\*55\*65mm
Charging time: About 3H Recharging current: 480mA

#### OPERATION INSTRUCTIONS IN DETAIL

- Press and hold the [Power switch key] for 2 seconds to turn it on, enter the cleaning mode, and the machine is level 1.
   [Level adjustment key] Adjust the temperature gear, the intensity is divided into three levels. (5 minutes smart timing)
- Short press the [Power switch key] to switch to the Moist mode, and the massage head starts to heat up.
   It can be press [Level adjustment key] to adjust the temperature. The intensity is divided into three levels. (5 minutes smart timino)
- Short press the [Power switch key] to switch to the EMS lift mode, the massage head starts
  to emit EMS micro-current, and you can press the [Level adjustment key] to adjust the
  EMS intensity. The intensity is divided into three levels. 5 minutes smart timina)
- Short press the 【Power switch key】 to switch to the Cool mode, the massage head starts to cool down, You can press 【Level adjustment key】 to adjust the temperature gear. The intensity is divided into three levels. ( 2 minutes smart timing).

Votice

[Red/Blue LED light key] Switch between red light and blue light.

After power on, the corresponding mode characters on the screen will flash, indicating that the instrument is working in this mode. The fan still works for 30 seconds after shutdown to dissipate heat.

6. The use steps are shown in the following figure:

It needs to be used with a cotton pad, attach the cotton pad, pour in the makeup remover, and turn on the clean mode. Warming + positive ion export + vibration massage can effectively purify nores and clear blackheads!

Note: When removing the cotton-fix loop, please pull out along the button position cotton-fix loop, or twist the cotton-fix loop 45° to automatically pop out.

(According to the needs of personal skin type, you can press he LED light adjustment key to adjust the red light or blue light for use)

Apply skin care products on the face or around the eyes, turn on the introduction mode, warm + negative ion introduction + vibration massage, so that the facial skin absorbs nutrients efficiently and locks in moisture. Make facial skin absorb more nutrients and lock in moisture. (According to the needs of personal skin type, you can press the LED light adjustment key to adjust the red light or blue light for use)

3 EMS mode

After cleansing, apply skin care products on the face, turn on the EMS lifting mode, EMS microcurrent stimulates the muscles, makes the skin more energetic and elastic, improves the fine lines on the skin surface, and restores the skin to youth, smoothness, softness and whiteness. (According to the needs of personal skin type, you can press the LED light adjustment key to adjust the red light or blue light for use!

Put a mask on your face and turn on the cool mode, which can effectively shrink pores and lock in skin moisture.

(According to the needs of personal skin type, you can press the LED light adjustment key to adjust the red light or blue light for use)

#### Kind tips

- The power consumption of this product is relatively large during cooling, the heat is high, and the fan cooling will delay. It needs to be placed for about 10 minutes for next time use after use cool function
- If the instrument vibrates intermittently during use, it may be due to dry skin or poor contact with the instrument. Increase the humidity of the skin appropriately. grip the sensor strip and use it tightly and close to the skin.
- 3. When the instrument is in use, if the sound of 'didi' appears and the last bar of the battery symbol flashes, it means that the power of the instrument is low and needs to be charged in time.
- 4. The battery symbol flashes when the instrument is charging, and the symbol lights up when fully charged.
- When using, hold the machine to touch the back sensor bar, and the massage head close to the face then machine will vibrate.
- When a few people who are sensitive to current hold the sensor bar on the back. it is normal that there may be a current sense, which can be used in a lower level according to the tolerance level.

1.Read all safety instruction before using

- 2. Follow the operating instructions to use this device.
- 3.Do not pull down or remake the device please consult the distributor for repairing.
- 4. Only use the device for its intended purpose as described in this manual.
- 5.Do not store or use the device in the high temperature and humidity place such as under sunshine or near fire or in the bathroom, etc. To avoid fire or electric shock. Do not use or place it in or near the high temperature appliance.
- 6.Do not use and place the device in the humid condition in case of any short circuit. electrical shock or fire.
- 7. Keep away from children and physical disabled people allow to use, close supervision is necessary when this device is operated by user under 18 years of age.
- 8. This product is not waterproof, please do not place it in water or in an environment with corrosive chemicals.
- 9. The hot and cold conductive sheet can be wiped clean with a cleaning cloth or wiped with a little alcohol for disinfection.
- 10. After using the ice compress mode, the massage head of the main unit will become hot, so please do not use it continuously.

#### WARNING

- 1.Please stop using when product abnormal heating to avoid burns.
- 2.Please do not drop or clash the device.
- 3.Please apply serum constantly during use.
- 4.Please do not use it if the power cord is damaged.
- 5.Below conditions are not allowed to use:
- Heart disease, fever, communicable disease, cancer, open cuts, acute disease. hypotension, hypertension, install pacemaker, artificial heart or lung, during medical

## Function 4မျိုးပါဝင်ပါတယ်။
